

BIOSTAR Announces Windows 7 support for AMD and Intel Motherboards

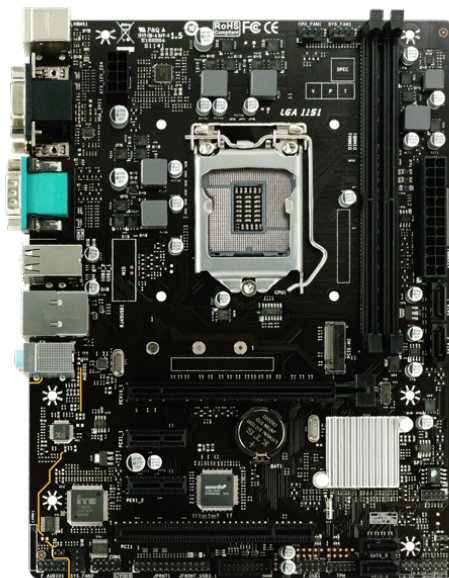

April 9th 2019, Taipei, Taiwan – BIOSSTAR, a leading manufacturer of motherboards, graphics cards, and storage devices announced the release of Windows 7 support for its latest Intel and AMD motherboards including the A10N-8800E and H310MHG. Windows 7 remains to be the second most-used Windows operating system for many home, office, schools and government organizations, PC's still running this operating system can continue to do so with BIOSSTAR's latest Intel and AMD platform motherboards. See the full list of compatible motherboards and BIOS updates below.

Whilst Microsoft may be ending support for the older Windows 7 operating system, users can still secure their machine with the upcoming SHA-2 Security Update. It is vital for legacy OS users to install the security update, machines without the security patch will be vulnerable. For advanced data security, the BIOSSTAR H310MHG motherboard also comes with a TPM header for TPM modules making it perfect for government organizations that require the highest level of data security. TPM modules are used in conjunction with other security technologies such as biometric verification, antivirus software, firewalls, smart cards, and others.

BIOSTAR AMD and Intel motherboards are fully compatible with Windows 7 operating system, suitable for home, business, and government use. Working hand in hand with Microsoft to deliver superb reliability with the latest security updates and technologies. BIOSTAR offers durable, stable, and affordable motherboards with ensured reliability and security for building Windows 7 desktop PCs.

SHA-2 Security Updates

The SHA-2 security updates will run for the entire year which started on March 12, 2019 with Stand-Alone security updates KB4474419 and KB4490628. Learn more about the SHA-2 Code Signing Support requirement for Windows 7 and the scheduled release of security updates at <https://support.microsoft.com/en-us/help/4472027/2019-sha-2-code-signing-support-requirement-for-windows-and-wsus>

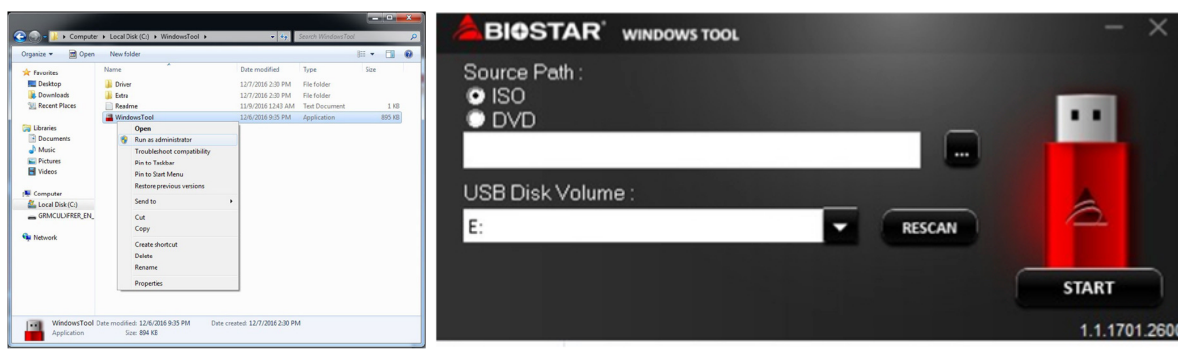

Creating Windows 7 Installation Image To USB

For H310MHD3, H310MHG, H310MHC2, and H310MHD PRO2 motherboards, BIOSTAR offers a tool for creating Windows 7 installation image to USB flash drives. The Windows 7 installation image will also work with other BIOSTAR motherboards that support Windows 7 operating system. See BIOSTAR's guide here:

https://www.biostar.com.tw/app/en/event/H310_windowstool/

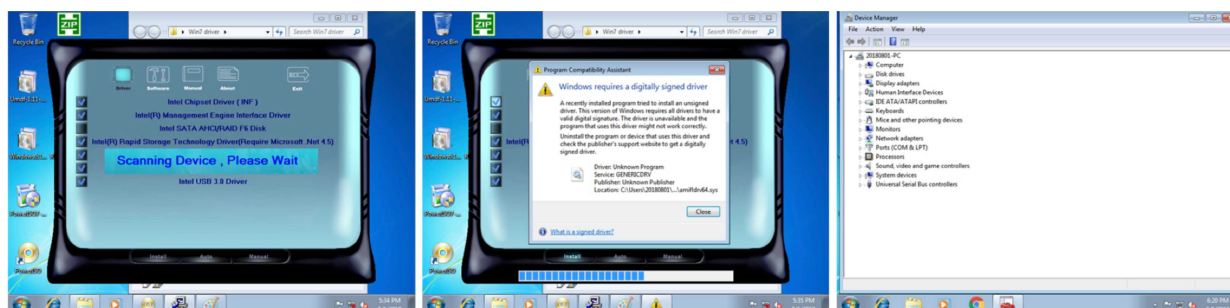

1. BIOSTAR Guide for installing Windows 7 via a USB Drive:

1. Download WindowsTools
2. Connect USB drive to computer
3. Follow steps here or steps on the Intel website

2. Installing Windows 7 and Onboard Drivers via a USB Drive

1. Install Windows 7 using the USB drive. Turn on system and press "F9" (note: Intel H310 does not provide Onboard VGA driver for Windows 7)
2. Enter OS and install Windows 7 driver:
 - Use the RI9.05B or later Driver CD version
 - Install Hot Fix for TPM2.0
 - Install Hot Fix for ME
 - Install Hot Fix for NET Framework 4.5.1
3. Install motherboard onboard drivers provided in the box (use the DVD Driver CD (RI9.05B or later version))
4. After installation, restart the computer.
